INDEX TO VOLUME IV

Actinomycetaceae, The nomenclature of the..... 585
Actinomycetes, Studies in the metabolism of..... 189
——Studies in the metabolism of. II..... 307
Aerobic spore-bearing bacteria in the intestinal tract of children..... 23
Agglutination..... 73
Amino acids, The rôle of the, in the metabolism of *Bacterium diphtheriae*. Studies on diphtheria toxin. II..... 217
Anaerobes, Methods for the isolation and cultivation of *Bacillus putrificus* and other obligate..... 171
——Modifications in the technic of Dick's plate method for isolating..... 299
Anaerobic tube, A modification of the Wright-Buchner..... 295
Atkins, K. N., Conn, H. J., *Chairman*. Harding, H. A., Kligler, I. J., Frost, W. D., and Prucha, M. J. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists..... 107
Autolysate, Yeast, as a culture medium for bacteria..... 183
B. aviscepticus. Relation between sucrose-fermentation and immunizing power by, Bacteriological notes. III..... 65
B. botulinus, Notes on..... 555
—— ——, The occurrence of, in nature..... 541
—— ——, The relation of, to forage poisoning or cerebrospinal meningitis in horses. Studies in forage poisoning..... 1
B. coli, The interpretation of, test results on a numerical and comparative basis as applied to the investigation of water and sewage..... 243
—— ——, The value of presumptive tests for, based on the routine use of lactose bile and lactose broth..... 609
B. putrificus, Methods for the isolation and cultivation of, and other obligate anaerobes..... 171
Bacteria, Aerobic spore-bearing, in the intestinal tract of children..... 23
——, A culture medium for the maintenance of stock cultures of..... 603
——, The growth of certain, in media of different hydrogen ion concentrations 409
——, Morphological changes during the growth of..... 615
——, Non-lactose fermenting, from polluted wells and subsoil..... 35
——, A preliminary report upon some halophilic..... 177
——, Studies on the classification of the colon-typhoid group of, with special reference to their fermentative reactions..... 429
——, A systematic study of the proteus group of..... 331
——, Thermophilic..... 301
——, The use of the nitrate-reduction test in characterizing..... 267
——, Yeast autolysate as a culture medium for..... 183
Bacterial, Studies on the, flora of the mouth and nose of the normal horse. 61

Bacterial variations induced by changes in the composition of culture media. 133
Bacteriological notes. I. Gas production by *Bact. pullorum;* II. *Bact. pullorum* infections in adult birds; III. Relation between sucrose-fermentation and immunizing power by *B. avisepticus*..... 65
Bacteriology, A contribution to the, of a fuso-spirillary organism, with special reference to its life history..... 505
—— On the, of dysentery in Norway..... 355
—— The value of a cooked meat medium for routine and special..... 149
Bacterium diphtheriae, The rôle of the amino acids in the metabolism of. Studies on diphtheria toxin. II..... 217
Bact. pullorum, Gas production by. Bacteriological notes I..... 65
—— —— infections in adult birds. Bacteriological notes II..... 65
Batchelor, Majorie Dietz. Aerobic spore-bearing bacteria in the intestinal tract of children..... 23
Bath, Water supply for a syringe..... 291
Bergey, D. H. Thermophilic bacteria..... 301
Birds, *Bact. pullorum* infections in adult, Bacteriological notes. II..... 65
Bonazzi, Augusto. On nitrification. II. Intensive nitrite formation in solution..... 43
Boyer, Edward E. H. Studies on the bacterial flora of the mouth and nose of the normal horse..... 61
Breed, R. S. and Conn, H. J. The nomenclature of the Actinomycetaceae. 585
—— —— ——. The use of the nitrate-reduction test in characterizing bacteria 267
Brueckner, A. L. and Graham, Robert. Studies in forage poisoning. The relation of *B. botulinus* to forage poisoning or cerebrospinal meningitis in horses..... 1
Buchanan, R. E. Agglutination..... 73
Bunker, John W. M. Studies of the diphtheria bacillus in culture..... 379
Burke, G. S. Notes on *Bacillus botulinus*..... 555
—— The occurrence of *Bacillus botulinus* in nature..... 541
Caldwell, Dorothy W., Hadley, Philip, and Heath, Bertha M. Bacteriological notes. I. Gas production by *Bact. pullorum;* II. *Bact. pullorum* infections in adult birds; III. Relation between sucrose-fermentation and immunizing power by *B. avisepticus*..... 65
Cerebrospinal meningitis, The relation of *B. botulinus* to forage poisoning or, in horses. Studies in forage poisoning..... 1
Changes, Bacterial variations induced by, in the composition of culture media..... 133
——, Morphological, during the growth of bacteria..... 615
Children, Aerobic spore-bearing bacteria in the intestinal tract of..... 23
Clark, Paul F. and Ruehl, W. H. Morphological changes during the growth of bacteria..... 615
Clark, Wm., Mansfield and Cohen, Barnett. The growth of certain bacteria in media of different hydrogen ion concentrations..... 409
Classification, Studies on the, of the colon-typhoid group of bacteria, with special reference to their fermentative reactions..... 429
Cohen, Barnett and Clark, Wm. Mansfield. The growth of certain bacteria in media of different hydrogen ion concentrations..... 409

Colon-typhoid group, Studies on the classification of the, of bacteria with special reference to their fermentative reactions 429
Colonies, The delayed development of, on plates seeded from disinfected sewage 157
Committee on the Descriptive Chart, Progress report for 1918 of the, of the Society of American Bacteriologists, Methods of pure culture study 107
Composition, Bacterial variations induced by changes in the, of culture media 133
Conn, H. J. and Breed, R. S. The nomenclature of the Actinomycetaceae. 585
—— —— ——. The use of the nitrate-reduction test in characterizing bacteria 267
Conn, H. J., *Chairman*, Harding, H. A., Kligler, I. J., Frost, W. D., Prucha, M. J. and Atkins, K. N. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists 107
Contribution, A, to the bacteriology of a fuso-spirillary organism, with special reference to its life history 505
Cooked meat medium, The value of a, for routine and special bacteriology 149
Cultivation, Methods for the isolation and, of *Bacillus putrificus* and other obligate anaerobes 171
Culture media, Bacterial variations induced by changes in the composition of 133
—— medium, A, for the maintenance of stock cultures of bacteria 603
—— ——, Yeast autolysate as a, for bacteria 183
——, Studies of the diphtheria bacillus in 379
Davis, Lewis and Ferry, Newell S. Studies on diphtheria toxin. II. The rôle of the amino acids in the metabolism of *Bacterium diphtheriae* 217
Dawson, Andrew Ignatius, Bacterial variations induced by changes in the composition of culture media 133
Delayed development, The, of colonies on plates seeded from disinfected sewage 157
Descriptive Chart, Progress report for 1918 of the Committee on the, of the Society of American Bacteriologists, Methods of pure culture study 107
Development, The delayed, of colonies on plates seeded from disinfected sewage 157
Dick's plate method, Modifications in the technic of, for isolating anaerobes 299
Diphtheria bacillus, Studies of the, in culture 379
—— toxin, Studies on. II. The rôle of the amino acids in the metabolism of *Bacterium diphtheriae* 217
Disinfected sewage, The delayed development of colonies on plates seeded from 157
Dysentery, On the bacteriology of, in Norway 355
Fermentative reactions, Studies on the classification of the colon-typhoid group of bacteria with special reference to their 429
Ferry, Newell S., and Davis, Lewis, Studies on diphtheria toxin. II. The rôle of the amino acids in the metabolism of *Bacterium diphtheriae* 217
Flora, Studies on the bacterial, of the mouth and nose of the normal horse 61
Forage poisoning, Studies in. The relation of *B. botulinus* to forage poisoning or cerebrospinal meningitis in horses 1

Frost, W. D., Conn, H. J., *Chairman*, Harding, H. A., Kligler, I. J., Prucha, M. J., and Atkins, K. N. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists..... 107
Fuso-spirillary organism, A contribution to the bacteriology of a, with special reference to its life history..... 505
Gas production by *Bact. pullorum*. Bacteriological notes, I..... 65
Graham, Robert and Brueckner, A. L. Studies in forage poisoning. The relation of *B. botulinus* to forage poisoning or cerebrospinal meningitis in horses..... 1
Growth, Morphological changes during the, of bacteria..... 615
——, The, of certain bacteria in media of different hydrogen ion concentrations..... 409
Hadley, Philip, Caldwell, Dorothy W. and Heath, Bertha M. Bacteriological Notes. I. Gas production by *Bact. pullorum;* II. *Bact. pullorum* infections in adult birds; III. Relation between sucrose-fermentation and immunizing power by *B. avisepticus*..... 65
Halophilic bacteria, A preliminary report upon some..... 177
Harding, H. A., Conn, H. J., *Chairman*, Kligler, I. J., Frost, W. D., Prucha, M. J. and Atkins, K. N. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists..... 107
Heath, Bertha M., Hadley, Philip, and Caldwell, Dorothy W. Bacteriological notes: I. Gas production by *Bact. pullorum;* II. *Bact. pullorum* infections in adult birds; III. Relation between sucrose-fermentation and immunizing power by *B. avisepticus*..... 65
Hill, H. W. Frank Fairchild Wesbrook..... 71
Holman, W. L. The value of a cooked meat medium for routine and special bacteriology..... 149
Horse, Studies on the bacterial flora of the mouth and nose of the normal.. 61
Horses, the relation of *B. botulinus* to forage poisoning or cerebrospinal meningitis in, Studies in forage poisoning..... 1
Hydrogen ion concentrations, The growth of certain bacteria in media of different..... 409
Immunizing power. Relation between sucrose-fermentation and, by *B. avisepticus*. Bacteriological notes, III..... 65
Intensive nitrite formation in solution. On nitrification..... 43
Interpretation, The, of *B. coli* test results on a numerical and comparative basis as applied to the investigation of water and sewage..... 243
Intestinal tract, Aerobic spore-bearing bacteria in the, of children..... 23
Isolation, Methods for the, and cultivation of *Bacillus putrificus* and other obligate anaerobes..... 171
Kligler, I. J. Non-lactose fermenting bacteria from polluted wells and subsoil..... 35
——. Yeast autolysate as a culture medium for bacteria..... 183
——. Conn, H. J., *Chairman*, Harding, H. A., Frost, W. D., Prucha, M. J. and Atkins, K. N. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists..... 107

Kligler, I. J., Winslow, C.-E. A., and Rothberg, Wm. Studies on the classification of the colon-typhoid group of bacteria, with special reference to their fermentative reactions.... 429
Kohman, Edward F. The so-called reduced oxygen tension for growing the meningococcus.... 571
Lactose bile, The value of presumptive tests for *Bacillus coli* based on the routine use of, and lactose broth.... 609
—— broth, The value of presumptive tests for *Bacillus coli* based on the routine use of lactose bile and.... 609
LeFevre, Edwin and Round, Lester A. A preliminary report upon some halophilic bacteria.... 177
Life history, A contribution to the bacteriology of a fuso-spirillary organism, with special reference to its.... 505
Media, Bacterial variations induced by changes in the composition of culture.... 133
——, The growth of certain bacteria in, of different hydrogen ion concentrations.... 409
Medium, The value of a cooked meat, for routine and special bacteriology. 149
——, Yeast autolysate as a culture, for bacteria.... 183
Mellon, Ralph R. A contribution to the bacteriology of a fuso-spirillary organism, with special reference to its life history.... 505
——. A modification of the Wright-Buchner anaerobic tube.... 295
——. Water supply for a syringe bath.... 291
Meningococcus, The so-called reduced oxygen tension for growing the.... 571
Metabolism, The rôle of the amino acids in the, of *Bacterium diphtheriae*. Studies on diphtheria toxin. II.... 217
——, Studies in the, of Actinomycetes.... 189
——, Studies in the, of Actinomycetes, II.... 307
Methods for the isolation and cultivation of *Bacillus putrificus* and other obligate anaerobes.... 171
—— of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists.... 107
Modification, A, of the Wright-Buchner anaerobic tube.... 295
Modifications in the technic of Dick's plate method for isolating anaerobes.. 299
Morphological changes during the growth of bacteria.... 615
Mouth, Studies on the bacterial flora of the, and nose of the normal horse. 61
Nature, The occurrence of *Bacillus botulinus* in.... 541
Nitrate-reduction test, The use of the, in characterizing bacteria.... 267
Nitrification, On. II. Intensive nitrite formation in solution.... 43
Nitrite formation, Intensive, in solution.... 43
Nomenclature, The, of the Actinomycetaceae.... 585
Non-lactose fermenting bacteria from polluted wells and subsoil.... 35
Northrup, Zae. Modifications in the technic of Dick's plate method for isolating anaerobes.... 299
Norway, On the bacteriology of dysentery in.... 355
Nose, Studies on the bacterial flora of the mouth and, of the normal horse.... 61
Notes on *Bacillus botulinus*.... 555

Obligate anaerobes, Methods for the isolation and cultivation of *Bacillus putrificus* and other 171
Occurrence, The, of *Bacillus botulinus* in nature 541
Oxygen tension, The so-called reduced, for growing the meningococcus 571
Plate method, Modifications in the technic of Dick's, for isolating anaerobes 299
Polluted, Non-lactose fermenting bacteria from, wells and subsoil 35
Preliminary report, A, upon some halophilic bacteria 177
Presumptive tests, The value of, for *Bacillus coli* based on the routine use of lactose bile and lactose broth 609
Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists. Methods of pure culture study .. 107
Proteus group, A systematic study of the, of bacteria 331
Prucha, M. J., Conn, H. J., *Chairman*, Harding, H. A., Kligler, I. J., Frost, W. D., and Atkins, K. N. Methods of pure culture study. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists 107
Pure culture study, Methods of. Progress report for 1918 of the Committee on the Descriptive Chart of the Society of American Bacteriologists ... 107
Relation, The, of *B. botulinus* to forage poisoning or cerebrospinal meningitis in horses 1
Rettger, Leo F. and Sturges, Wm. S., Jr. Methods for the isolation and cultivation of *Bacillus putrificus* and other obligate anaerobes 171
—— and Wenner, John J. A systematic study of the proteus group of bacteria 331
Ritter, Neva, The value of presumptive tests for *Bacillus coli* based on the routine use of lactose bile and lactose broth 609
Rôle, The, of the amino acids in the metabolism of *Bacterium diphtheriae*. Studies on diphtheria toxin, II 217
Rothberg, Wm., Winslow, C.-E. A., and Kligler, I. J. Studies on the classification of the colon-typhoid group of bacteria, with special reference to their fermentative reactions 429
Round, Lester A. and LeFevre, Edwin. A preliminary report upon some halophilic bacteria 177
Ruehl, W. H. and Clark, Paul F. Morphological changes during the growth of bacteria 615
Sewage, The delayed development of colonies on plates seeded from disinfected 157
Society of American Bacteriologists, Progress report for 1918 of the Committee on the Descriptive Chart of the. Methods of pure culture study. 107
Spore-bearing, Aerobic, bacteria in the intestinal tract of children 23
Stein, Milton F. The interpretation of *B. coli* test results on a numerical and comparative basis as applied to the investigation of water and sewage. 243
Stock cultures, A culture medium for the maintenance of, of bacteria 603
Studies in forage poisoning. The relation of *B. botulinus* to forage poisoning or cerebrospinal meningitis in horses 1
—— in the metabolism of Actinomycetes 189
—— in the metabolism of Actinomycetes, II 307
—— of the diphtheria bacillus in culture 379

Studies on diphtheria toxin. II. The rôle of the amino acids in the metabolism of *Bacterium diphtheriae*..... 217
—— —— the bacterial flora of the mouth and nose of the normal horse.... 61
—— —— the classification of the colon-typhoid group of bacteria, with special reference to their fermentative reactions..... 429
Sturges, Wm. S., Jr. The delayed development of colonies on plates seeded from disinfected sewage..... 157
—— and Rettger, Leo F. Methods for the isolation and cultivation of *Bacillus putrificus* and other obligate anaerobes..... 171
Subsoil, Non-lactose fermenting bacteria from polluted wells and..... 35
Sucrose-fermentation, Relation between, and immunizing power by *B. avisepticus*, Bacteriological notes, III..... 65
Syringe bath, Water supply for a..... 291
Systematic, A, study of the proteus group of bacteria..... 331
Thermophilic bacteria..... 301
Thjøtta, Th. On the bacteriology of dysentery in Norway..... 355
Toxin, Studies on diphtheria. II. The rôle of the amino acids in the metabolism of *Bacterium diphtheriae*..... 217
Typhoid, Studies on the classification of the colon-, group of bacteria with special reference to their fermentative reactions..... 429
Value, The, of a cooked meat medium for routine and special bacteriology.. 149
——, ——, —— presumptive tests for *Bacillus coli* based on the routine use of lactose bile and lactose broth..... 609
Variations, Bacterial, induced by changes in the composition of culture media..... 133
Waksman, Selman A. Studies in the metabolism of Actinomycetes..... 189
——. Studies in the metabolism of Actinomycetes, II..... 307
Water and sewage, The interpretation of *B. coli* test results on a numerical and comparative basis as applied to the investigation of..... 243
—— supply for a syringe bath..... 291
Wells, Non-lactose fermenting bacteria from polluted, and subsoil..... 35
Wenner, John J., and Rettger, Leo F. A systematic study of the Proteus group of bacteria..... 331
Wesbrook, Frank Fairchild..... 71
Winslow, C.-E. A., Kligler, I. J., and Rothberg, Wm. Studies on the classification of the colon-typhoid group of bacteria, with special reference to their fermentative reactions..... 429
Worth, M. Cobb, A culture medium for the maintenance of stock cultures of bacteria..... 603
Wright-Buchner anaerobic tube, A modification of the..... 295
Yeast autolysate as a culture medium for bacteria..... 183
